

DKA

- 1. When you are suspicious for DKA do you get a VBG or an ABG? How good is a VBG for determining acid/base status?**
- 2. Do you use serum or urine ketones to guide your diagnosis and treatment of DKA?**
- 3. Do you use IV bicarbonate for the treatment of severe acidosis in DKA? If so, when?**
- 4. When do you start an insulin infusion in patients with hypokalemia? Bolus or no bolus?**
